The history of science in St. Louis extends back nearly to the time of its founding as one of the first settlements of Upper Louisiana one hundred and fifty years ago. The Jesuit missionaries, the great pioneers of the north and west, were the first white persons to visit the Mississippi Valley and the adjoining country, Father Marquette, the intrepid explorer, having been the first to pass the lonely forest that covered the site of the future city of St. Louis in the year 1673. Fortunately the early missionaries were men of learning and observation. While they acquitted themselves faithfully of the duties of their calling, they recorded carefully the progress of events around them. The course of the Mississippi and the nature of the country were known to them and to the traders,...
